Summary

I'm a Software Engineer based in Bondowoso, East Java, with a passion for Front-End Development. I enjoys turning ideas into functional and visually appealing web experiences. I've worked with various front-end frameworks and love building things for the web—be it simple websites or interactive applications.

Skills

Hard Skills   : PHP, JavaScript, Laravel, React, NextJS, Astro JS, Tailwind CSS, Bootstrap
Soft Skills   : Time Management, Teamwork, Adaptability

Work Experiences

Front End Developer   Jun 2025 - Jul 2025
Freelance - Remote
- Refined the web application's design to align with client specifications.
- Adjusted the user interface based on client feedback.
- Improved the visual appearance of the web application as requested.
- Implemented pages from Figma designs using Laravel's Blade templating engine.

Web Developer Intern   Sept 2024 - Feb 2025
CV Nusantara Tama - On Site
- Developing some web applications using Laravel.
- Collaborated with the back-end team to develop some web applications.
- Convert designs into real world applications and pages using Laravel Front End Tech (Blade).

Projects

Anime Recommender System   Mar 2025 - Apr 2025
- Developed an anime recommendation system to help users discover shows that match their personal preferences.
- Analyzed user data such as preferred genres, studios, and favorite anime.
- Implemented a content-based filtering recommendation algorithm.
- Developed with Laravel for the web application and Flask to serve the recommendation API.

ENEWS INDO   Jan 2025 - Feb 2025
- A trusted media portal delivering fast, informative, educational, and inspiring news. Currently, enewsindo.co.id has established a network of regional news portals across East Java.
- Dedicated page for showcasing featured news in poster format (PNG).
- Built as a monolithic application and styled using TailwindCSS.

Al-Kandari Landing Page   Sept 2024
- Developed a modern, responsive landing page for Masjid Al-Kandari, focusing on aesthetics, intuitive navigation, and clear information presentation.
- Implemented the web application using ReactJS based on Figma design mockups.
